• Discuss next steps for landscape outreach
• Discuss timeline for finalizing landscape community decisions

Background & Understanding

• DART has planned for 15-foot sound mitigation walls in the areas identified in the FEIS. Residential utility conflicts, grading and drainage, and/or future hike and bike trail.

Addition to Betterment landscaping. Trees or shrubs may be prohibited by existing vegetation,

Base FEIS Mitigation Landscaping:

Corridor Betterments Program for residential adjacent properties that will not have sound

Residential Adjacent Betterments that are available to all residential adjacent properties

• Other existing visual buffers (i.e. fencing, vegetation, site distance, topography, alleys, structures etc.)
• Future hike and bike trail location
• ROW space constraints
• Topography and slope

Existing and proposed site conditions that contributed to the recommendations noted herein include

wall is analyzed independently.

Methodology for Determining Treatments

Methodology

Planting treatments are determined by using a combination of public (RAPO) and City preference (by

How to Stay Informed

• Mail your Community Engagement Representative
• DART Hotline: 972-833-2856
• Sign up for Project Alerts at www.DART.org/SilverLine
• Attend Meetings Virtually
• Email: SilverLine@DART.org
• Visit: www.DART.org/SilverLine

Meeting.

o Thursday, July 8th – Coppell/Cypress Waters (All Groups)
• Color and Finish Selection – November 2020

o Thursday, July 1st – Plano (All Groups)
• Betterments Program Ballot Results

o Workshops #1 – June 2019
• Workshops #4 – July 2020

o City of Richardson
• DART Led Betterments Programs

o Town of Addison
• Betterments Program Workshop Series Schedule

Move Mode

The top reference map shows the surrounding city limits of the greater Dallas area and highlights the specific city of discussion.

The individual wall plans contain both existing and proposed information which aid in determining a proposed landscape treatment (i.e. vines, shrubs, ornamental trees or shade trees).

PROS:
- Native
- Easy to maintain
- Attracts pollinators
- Evergreen

CONS:
- Needs water to bloom well
- Needs annual maintenance

VINES

- DON'T PLANT non-natives
- Can be invasive if not controlled
- Difficult to control
- Needs annual maintenance
- Native
- Easy to maintain
- Attracts pollinators
- Evergreen
- Drops seeds and can be invasive
- Can irritate skin
- Tough
